

# STUDENT ROBOTICS 2020

KICKSTART

# KICKSTART 2020

1. What is Student Robotics
2. Schedule for the year
3. Designing your robot
4. Building your robot
5. Developing your robot
6. Health and safety
7. The game
8. The rest of today

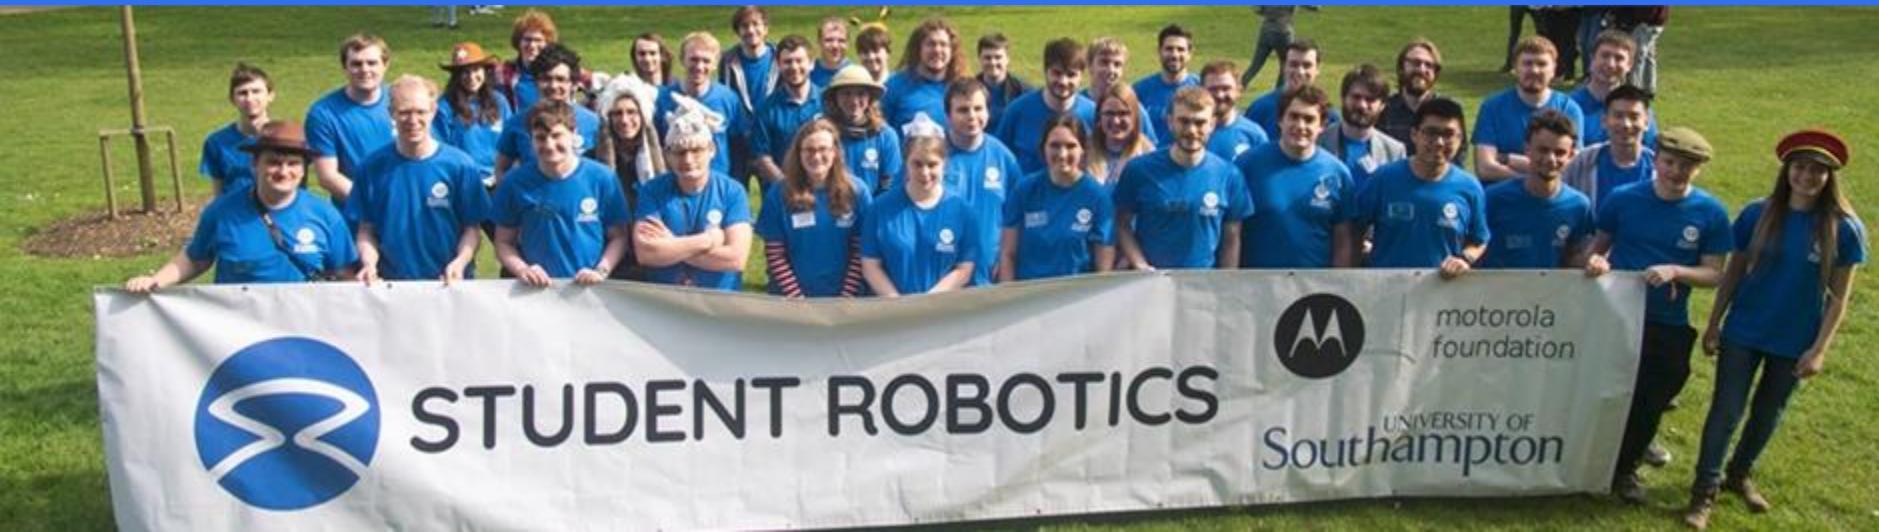

# WHAT IS STUDENT ROBOTICS?

# The Volunteers

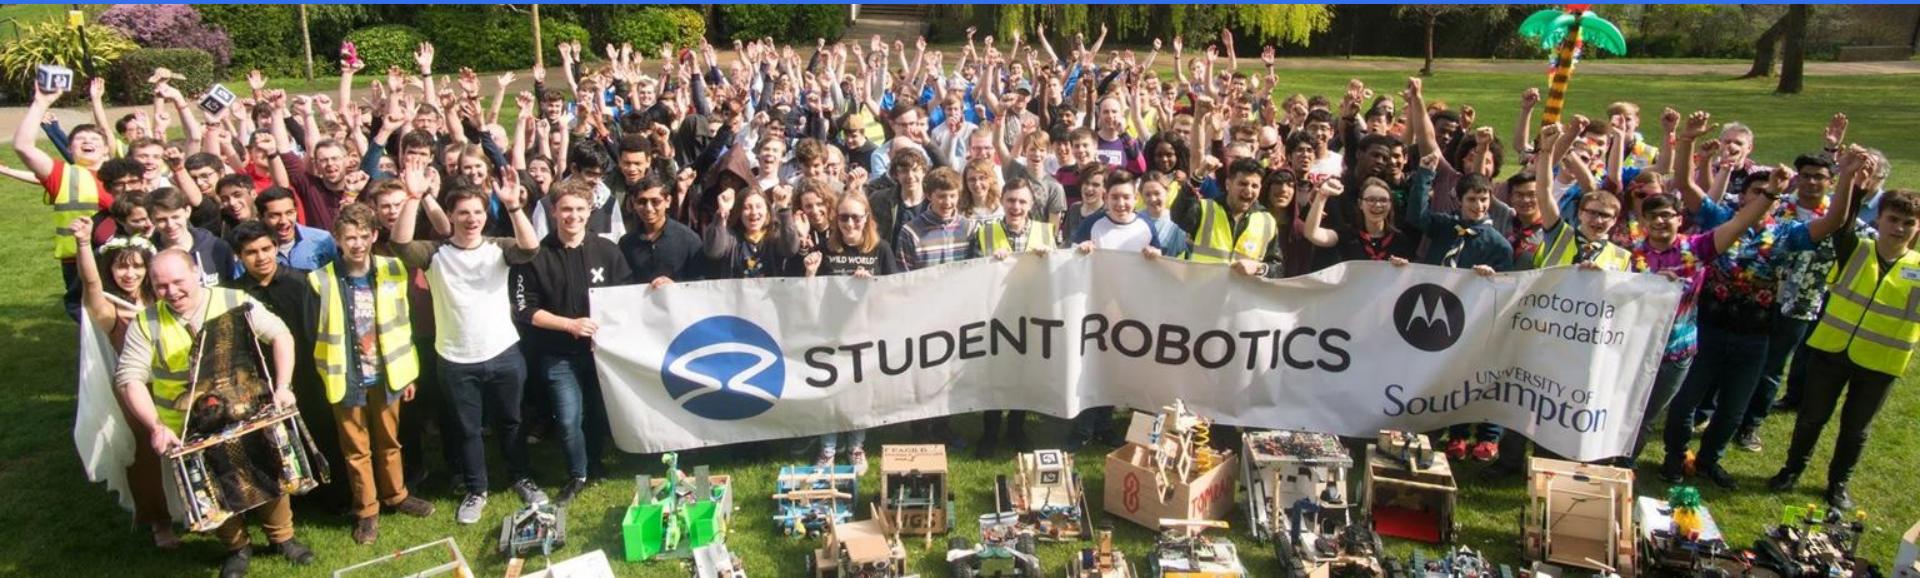

We may be nerds, but we aren't scary!

We're here to help!

# The Teams

There's 37 of you!  
(not all in this room)

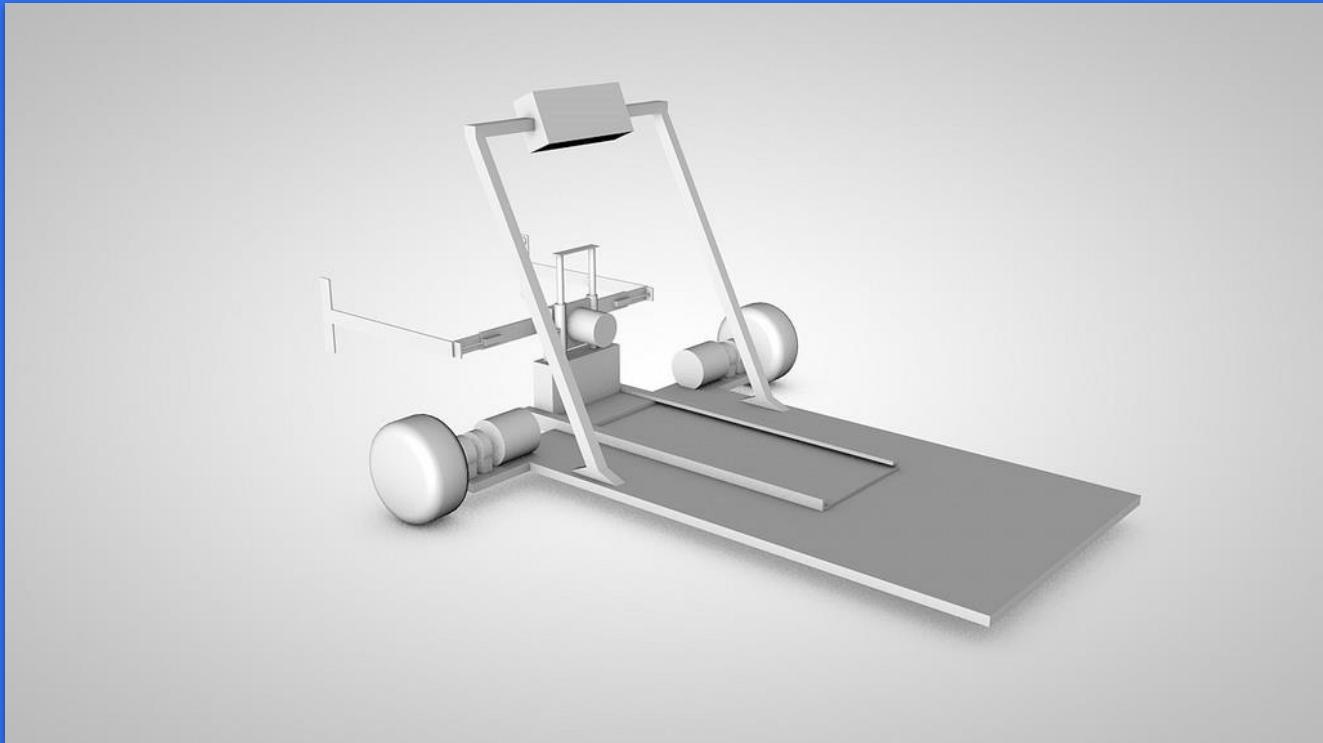

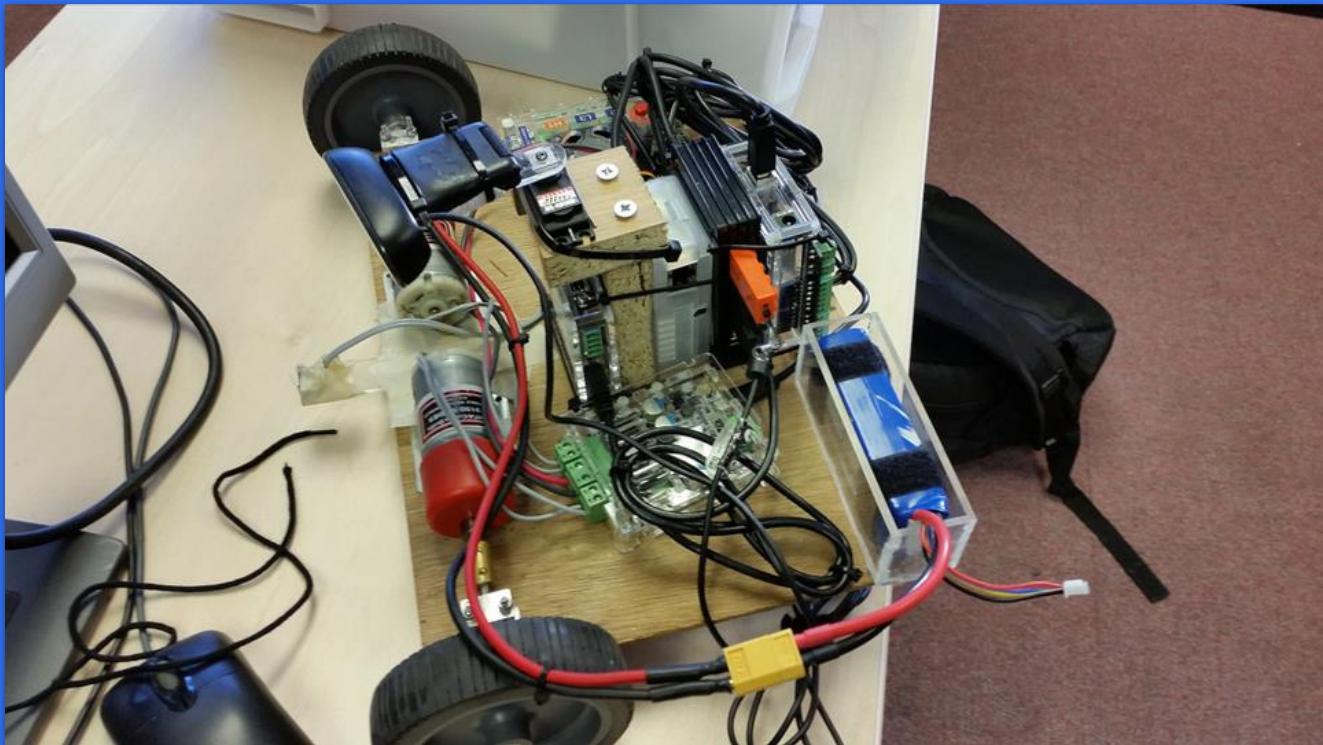

# 6 MONTHS

You have **ONLY** 6 months to...

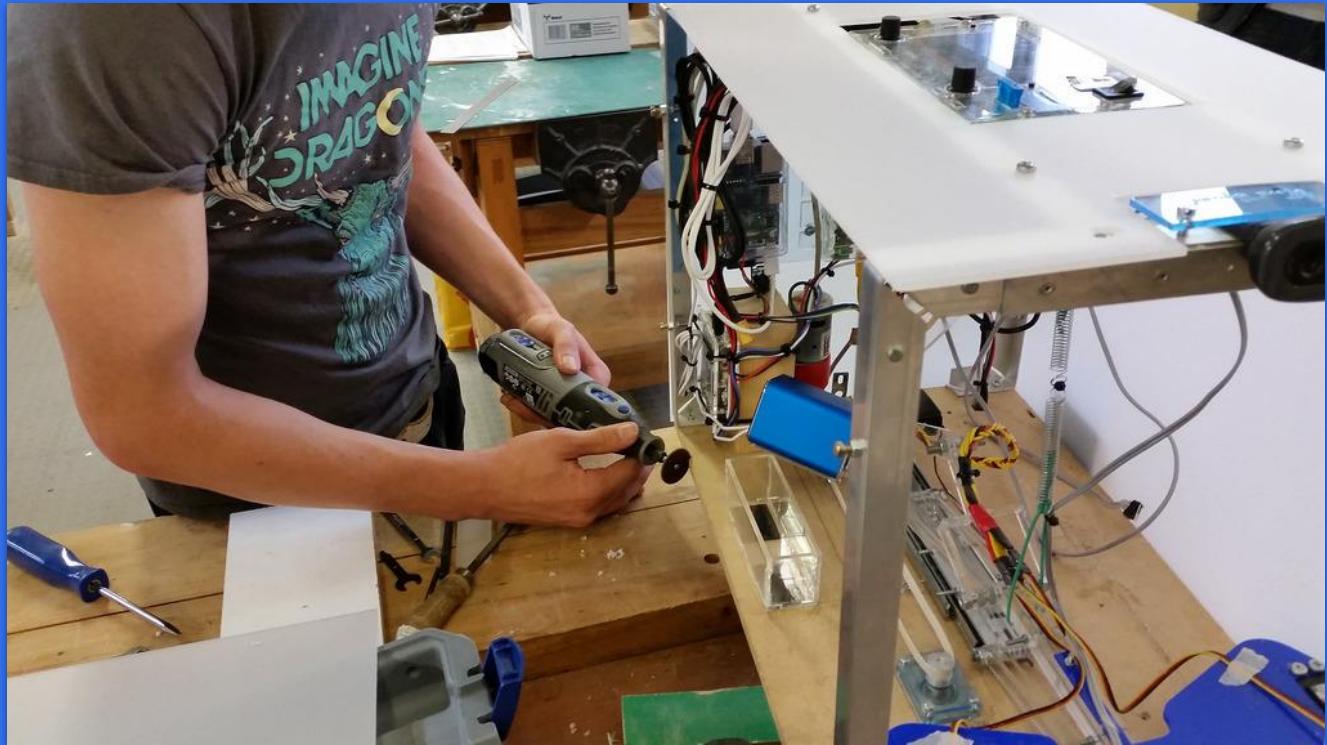

# Design

# Prototype

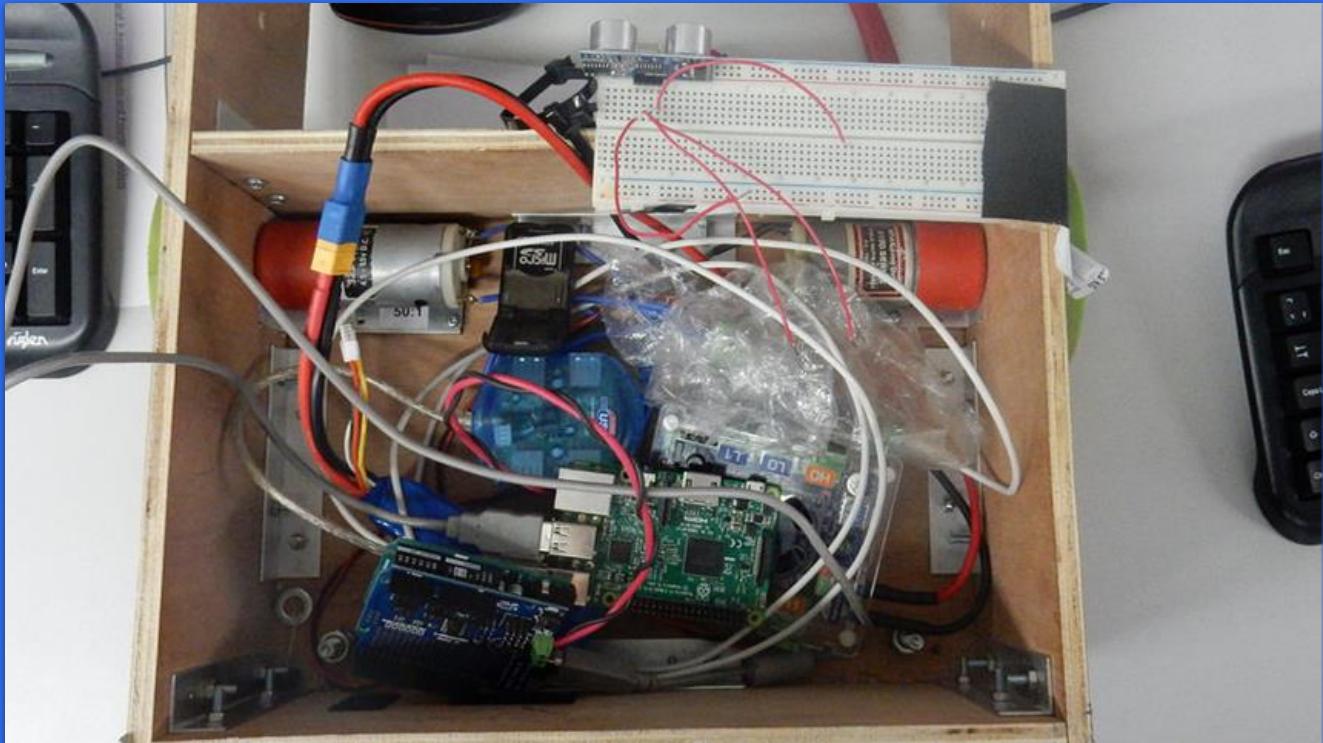

# Build

# Do all the electronics

(Hopefully better than this)

# Write lots of code

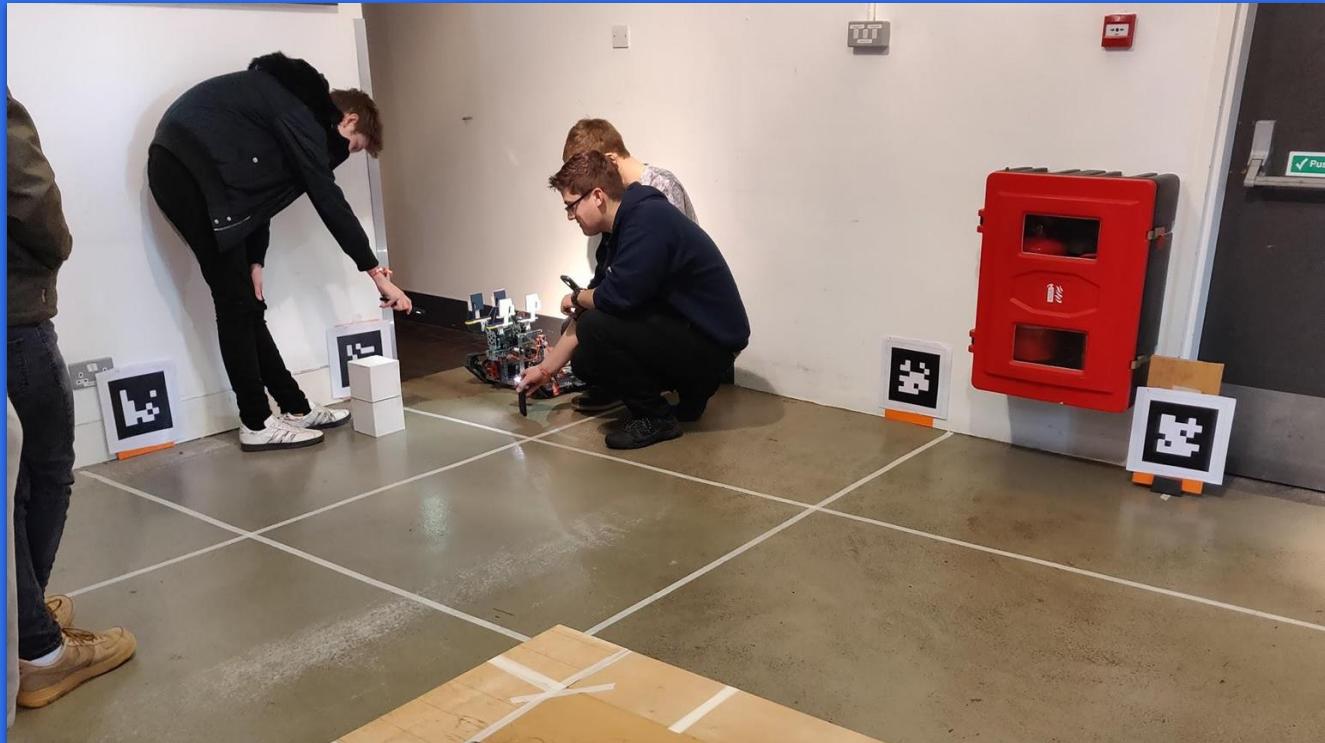

# Work as a team

# \* Work as a team

# Test it a *bajillion* times

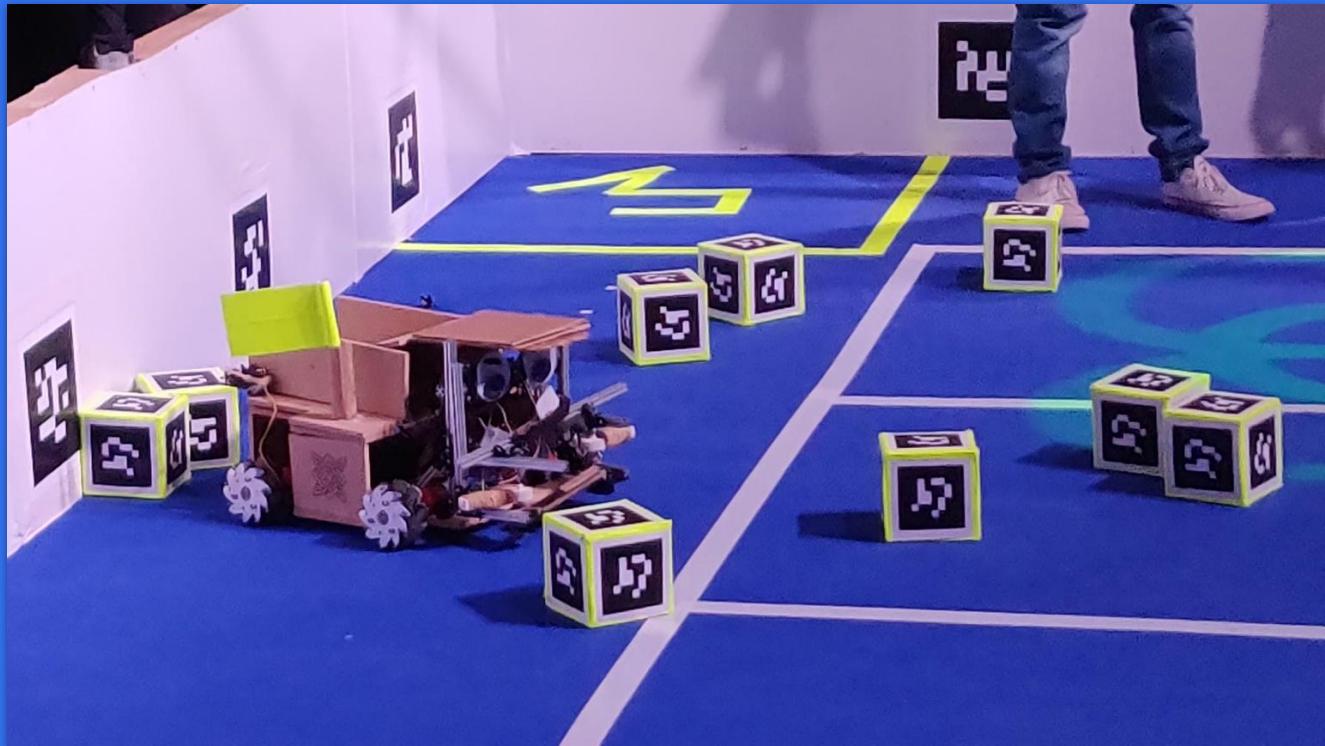

# Get your robot inspected

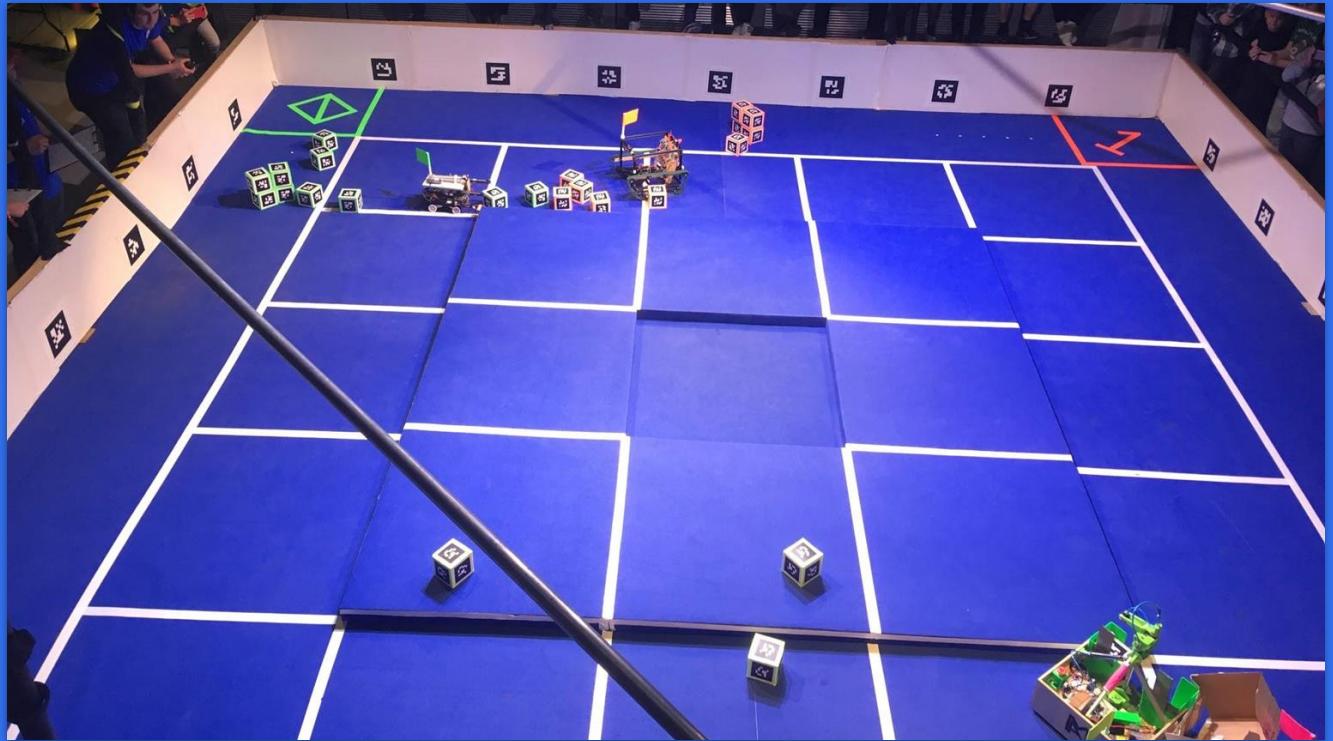

# Compete,

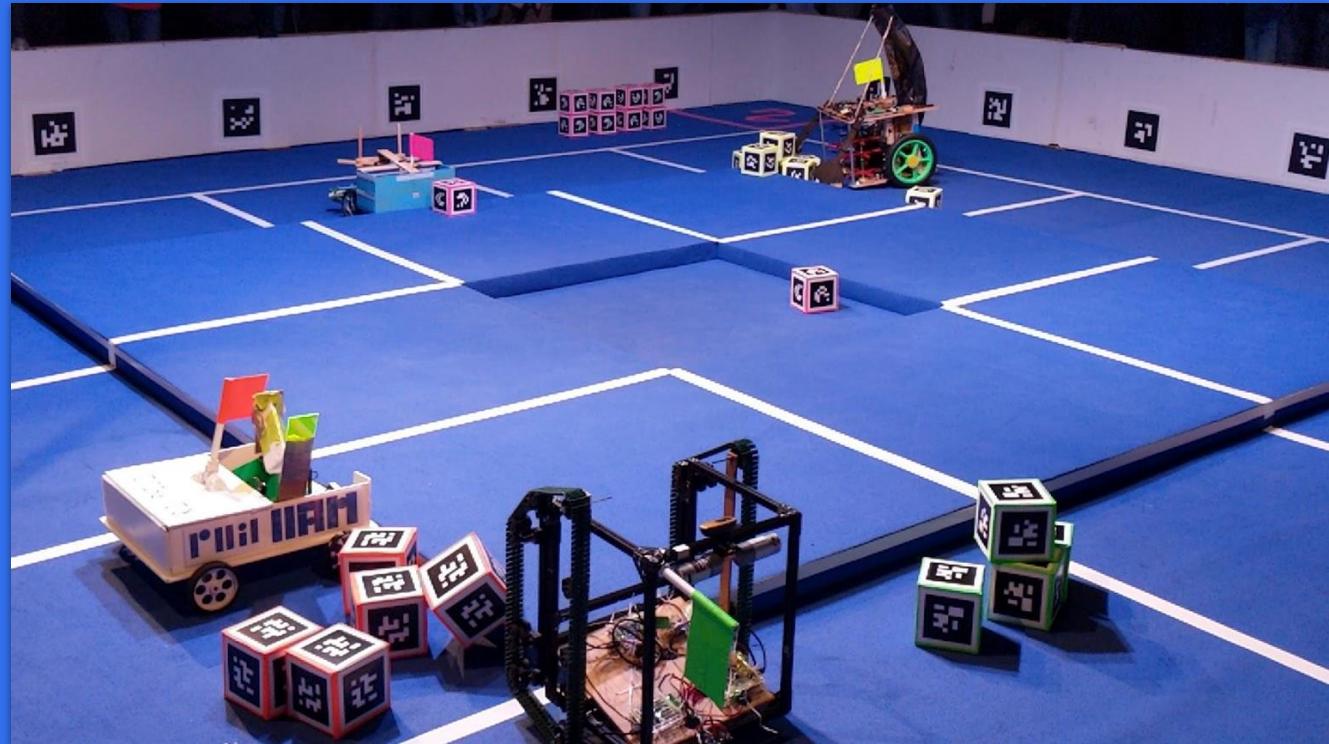

# Compete some more,

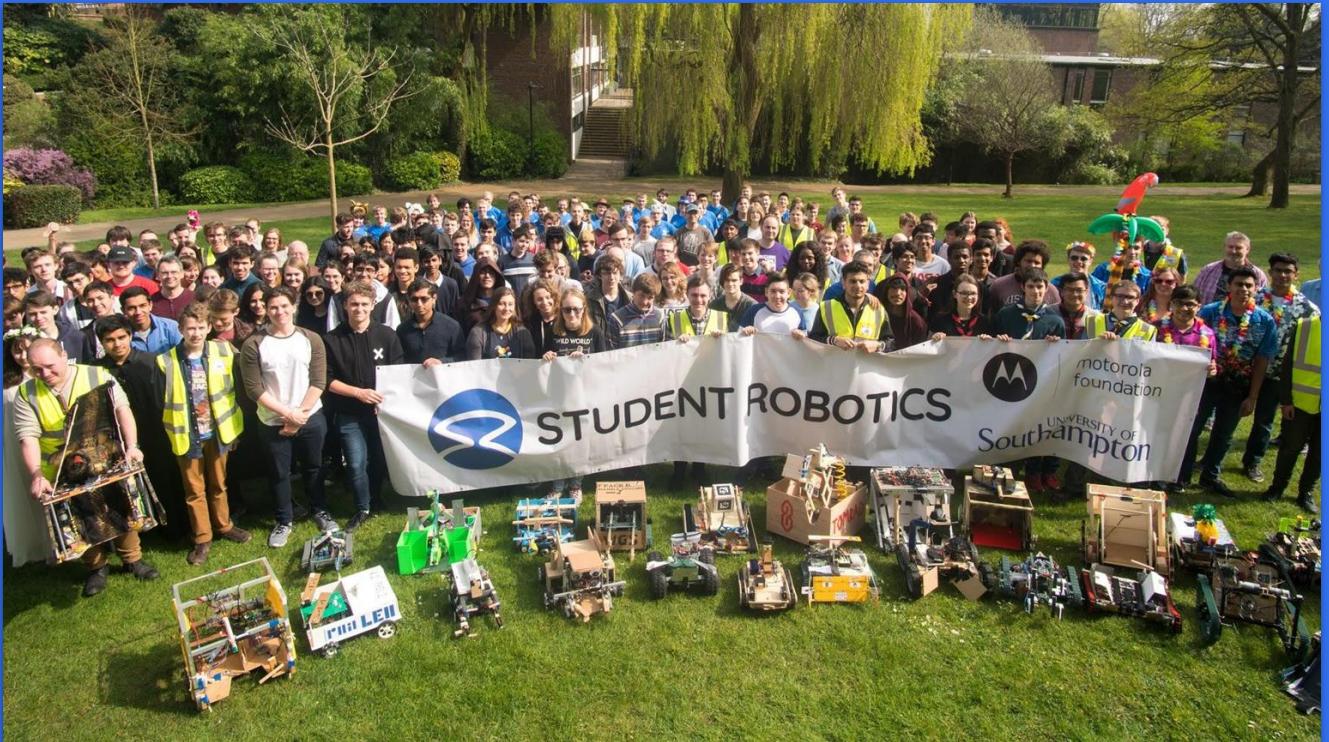

# Compete *even* more!

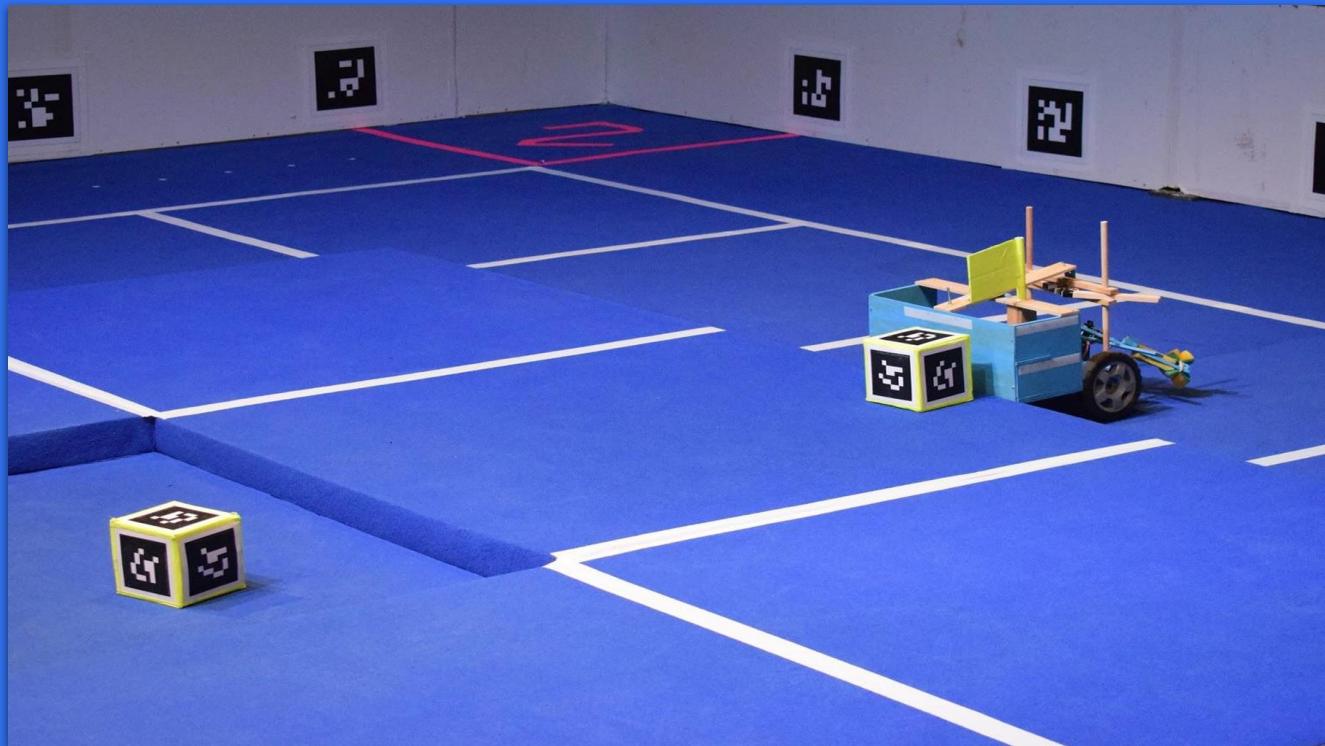

# Meet other robots

# Meet other people

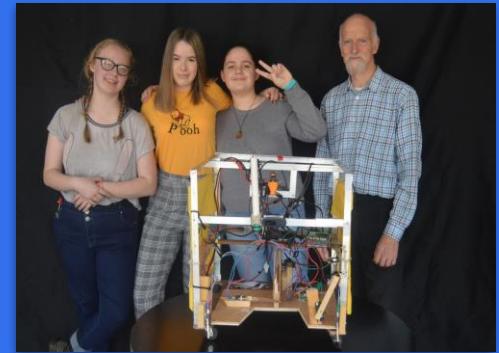

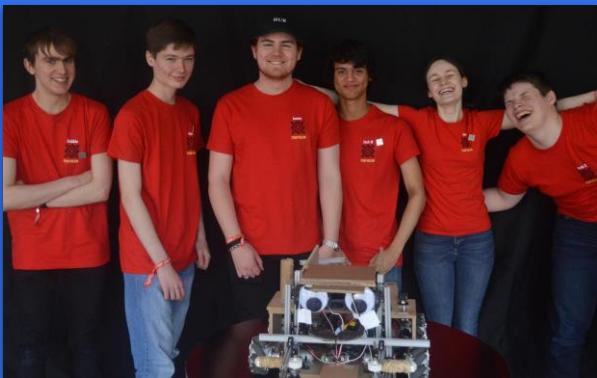

# Score some points

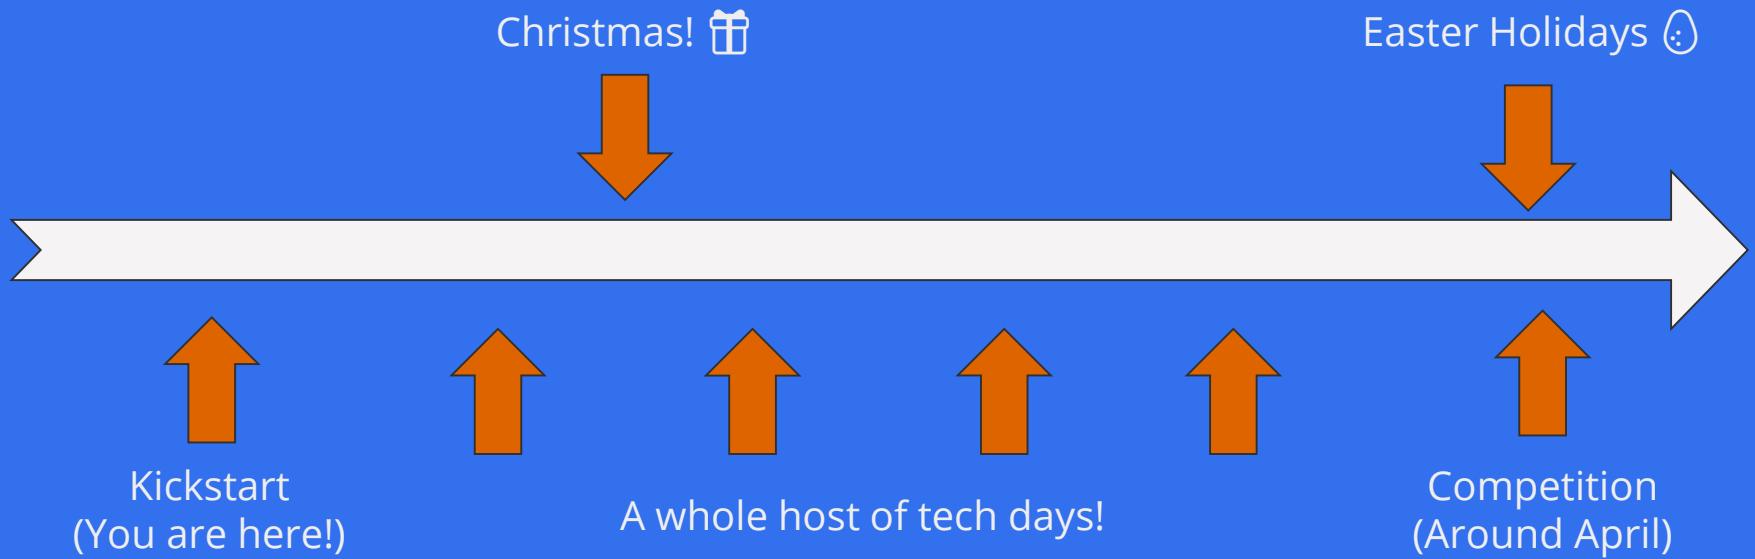

# Win some prizes

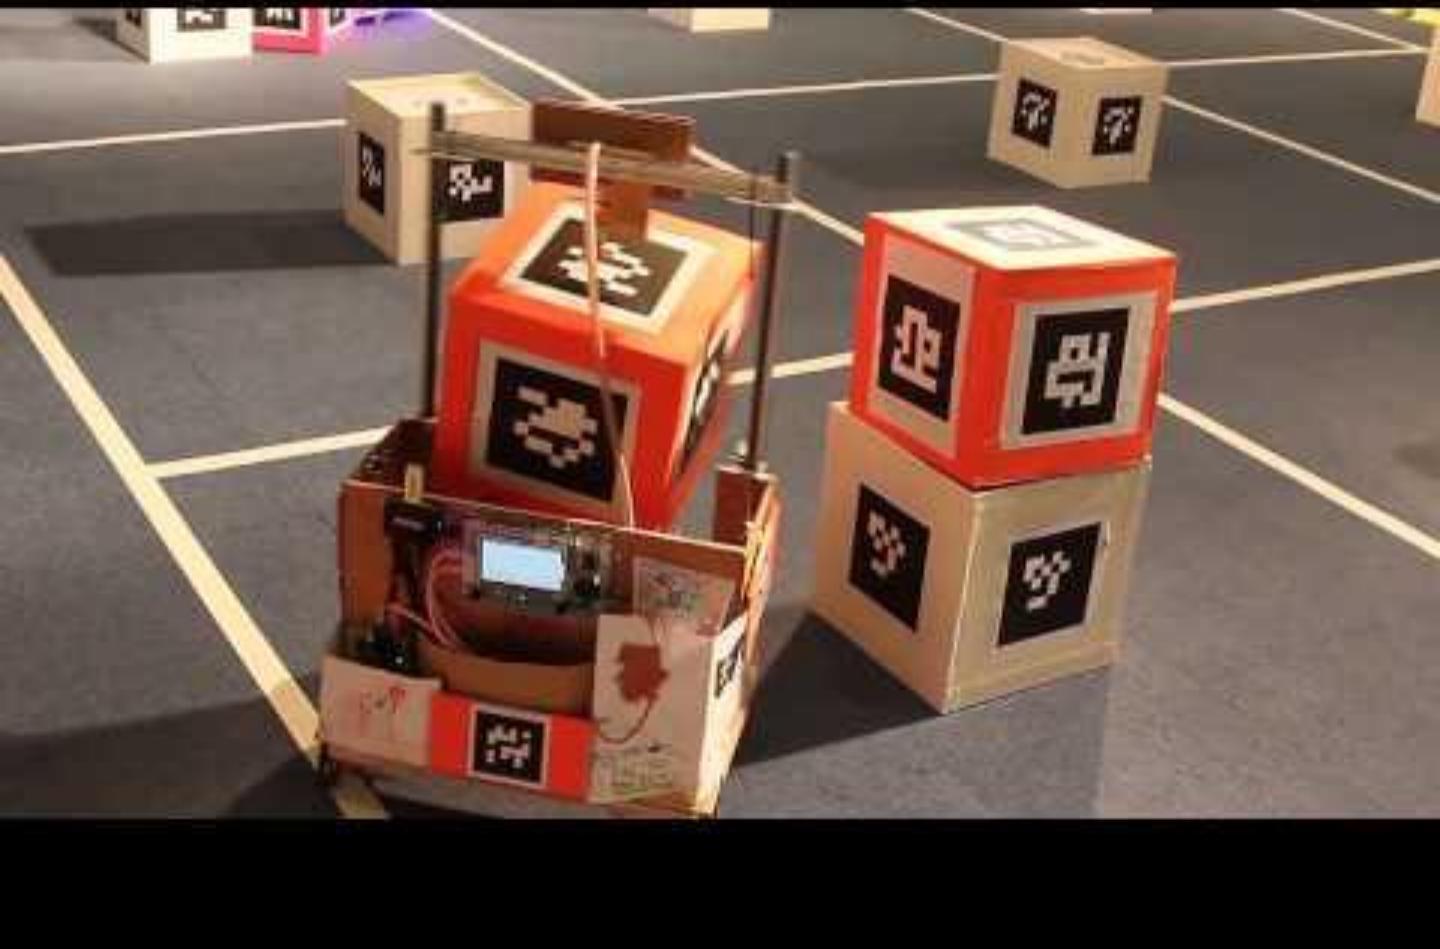

# Have fun!

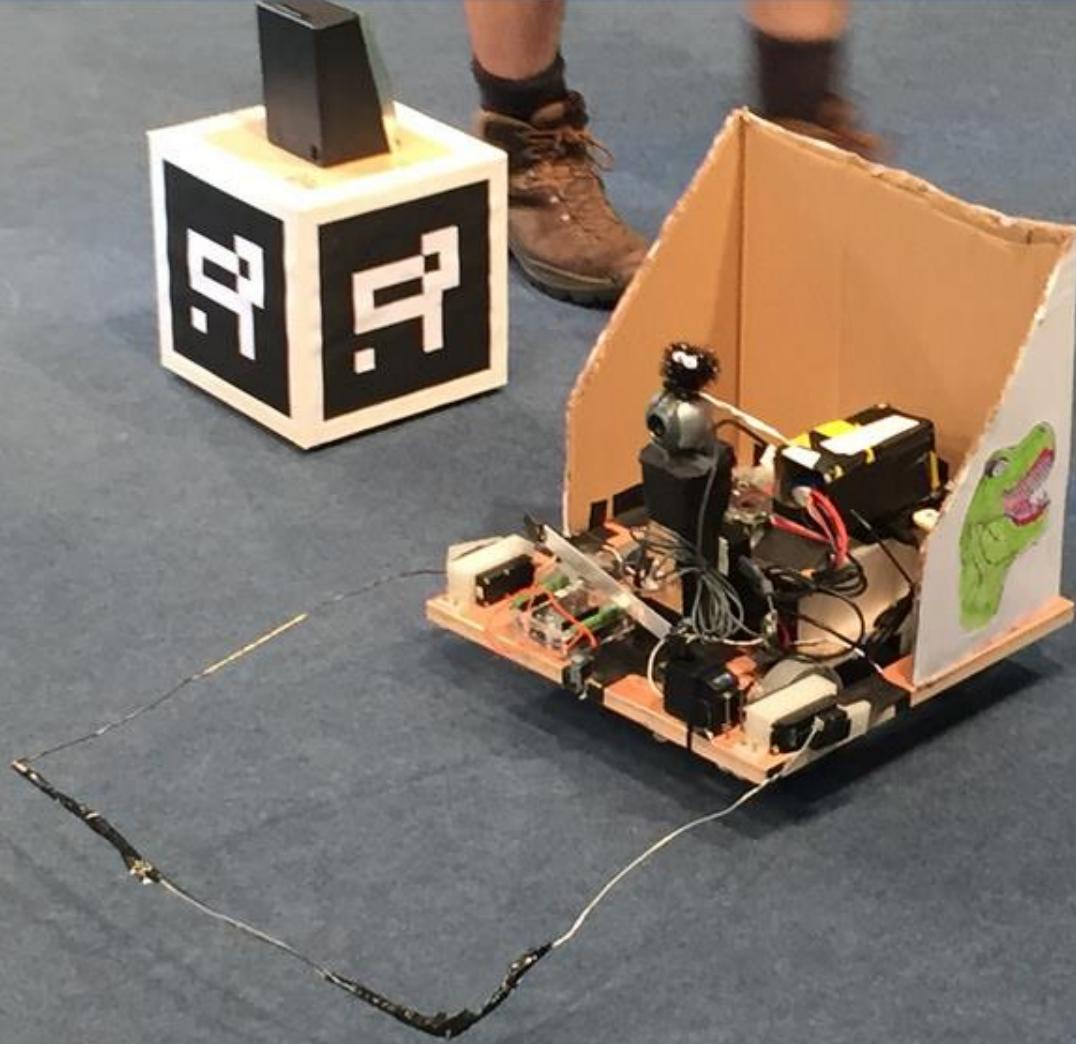

# Schedule for the year

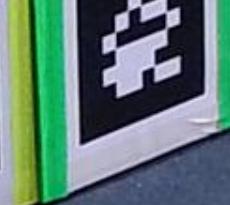

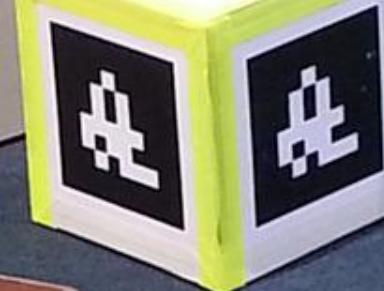

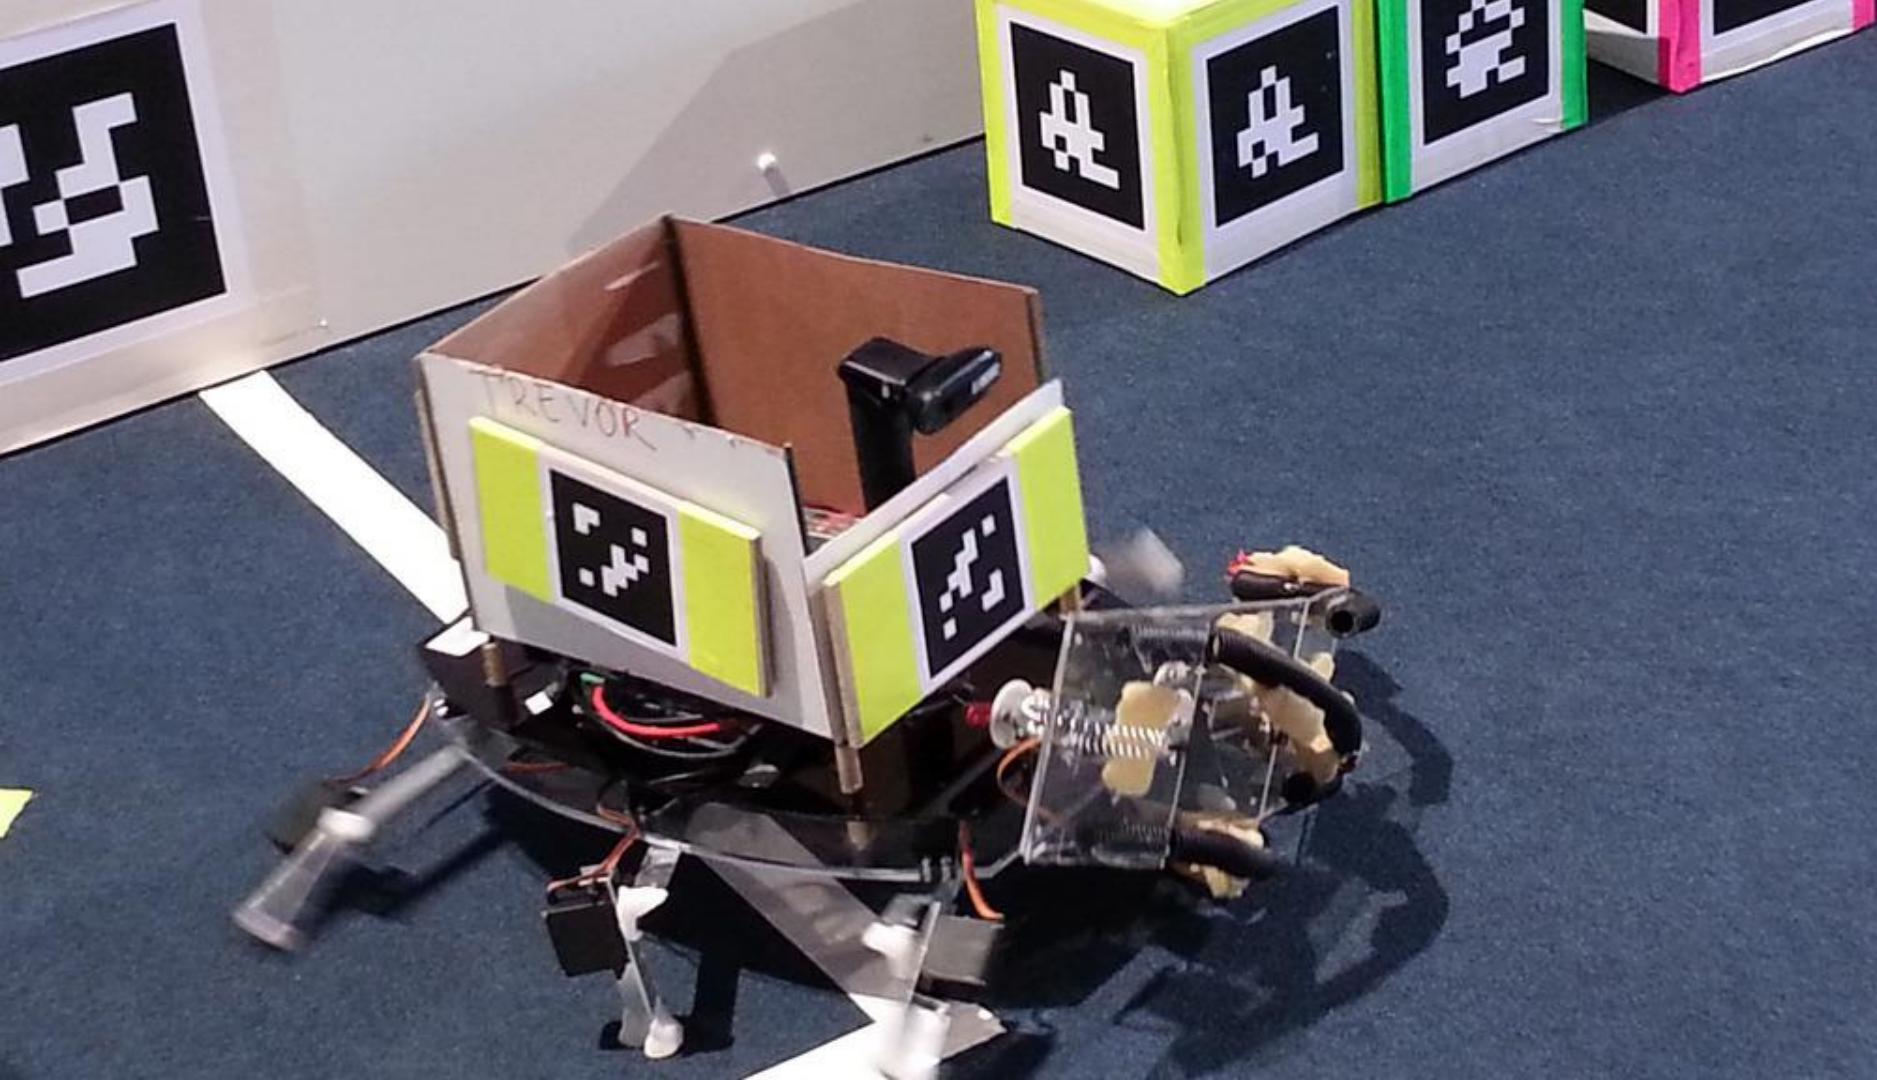

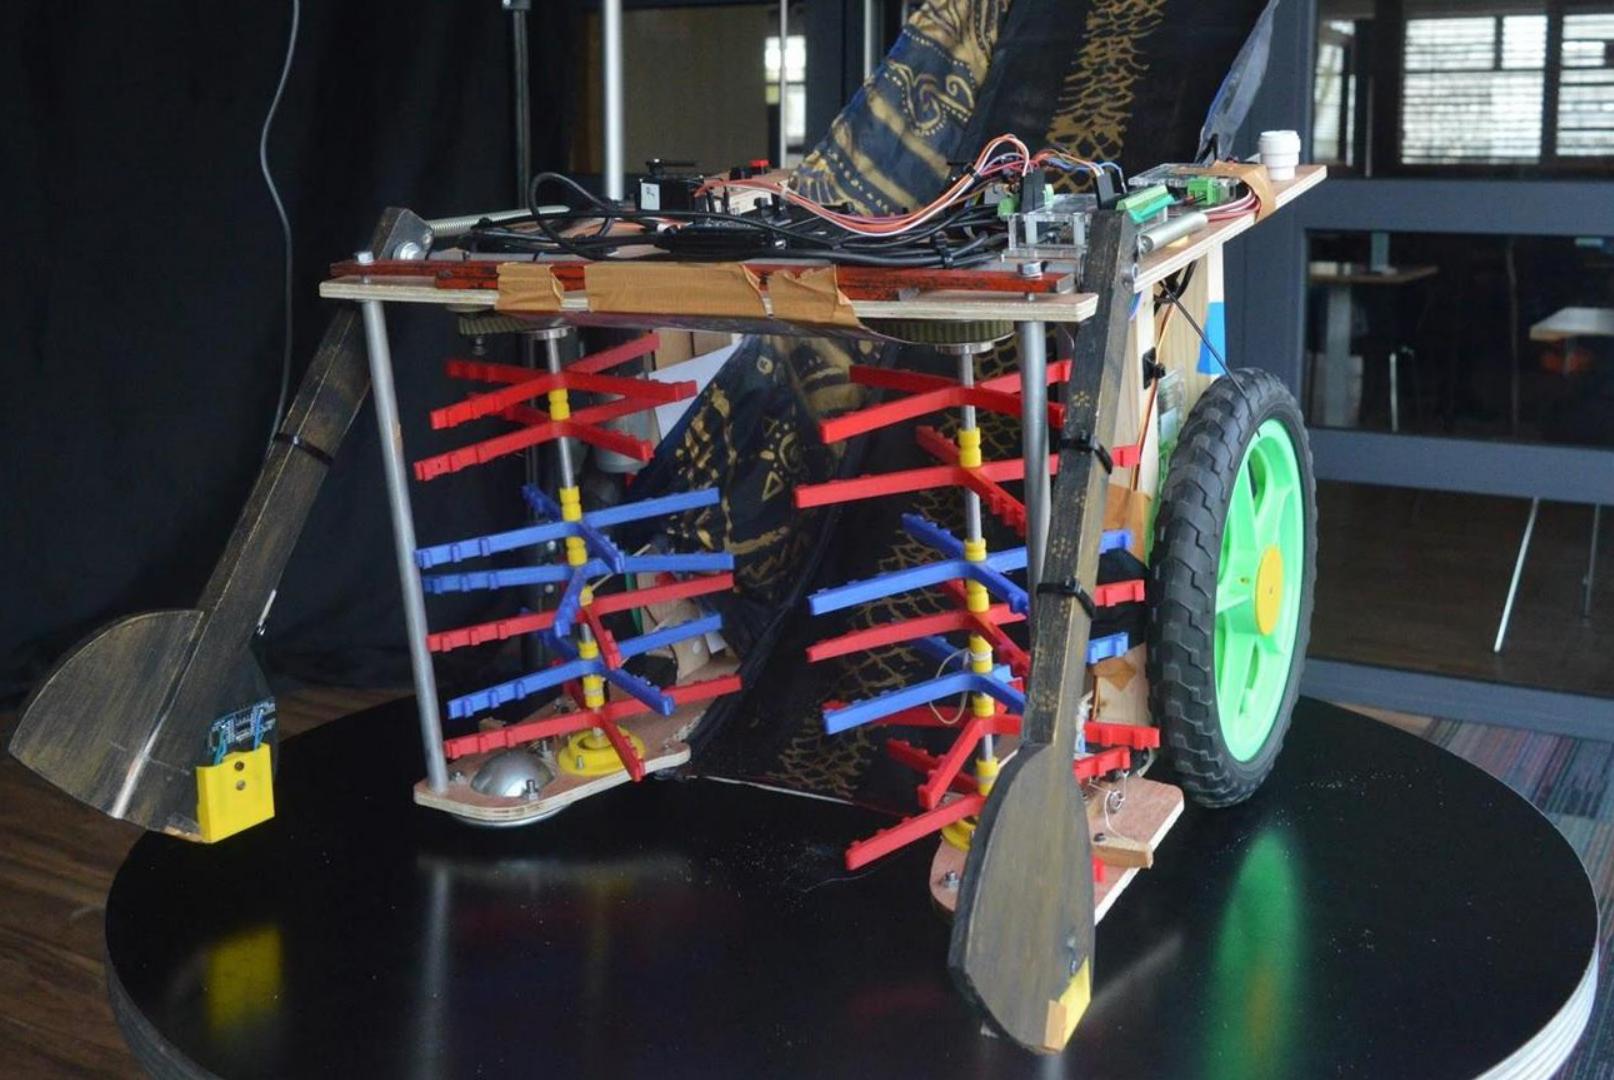

# WHAT DOES A ROBOT LOOK LIKE?

# Design Tips

**Read the rules first!**

- Movement
- Exposed Mechanisms
- Servos
- Couplings
- Sensors
- Size
- Tooling

# Design Tips

**Read the rules first!**

- Movement
- Exposed Mechanisms
- Servos
- Couplings
- Sensors
- Size
- Tooling

# Design Tips

## Sensors

- Camera
- Bump Sensor
- Light gates
- Potentiometer
- Wheel Encoders
- Accelerometer
- Gyroscope

# Design Tips

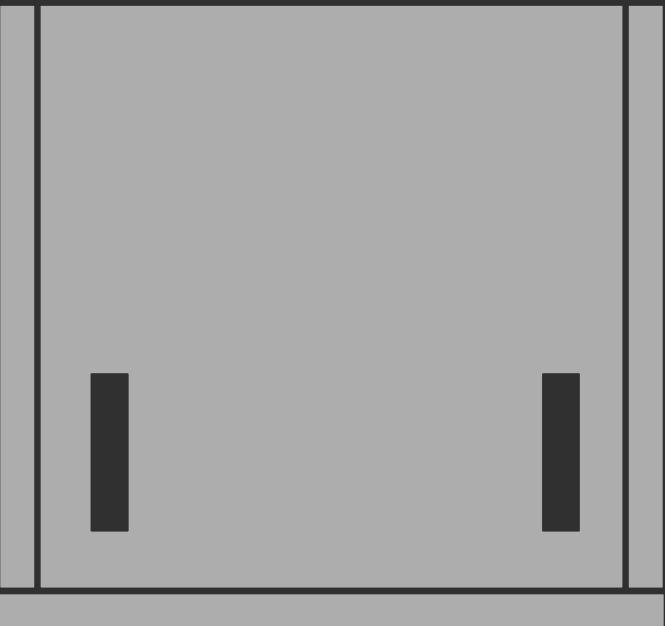

## Size

From the rules:

*"At the beginning of each match, robots must fit within a cube with 500mm internal sides."*

# Design Tips

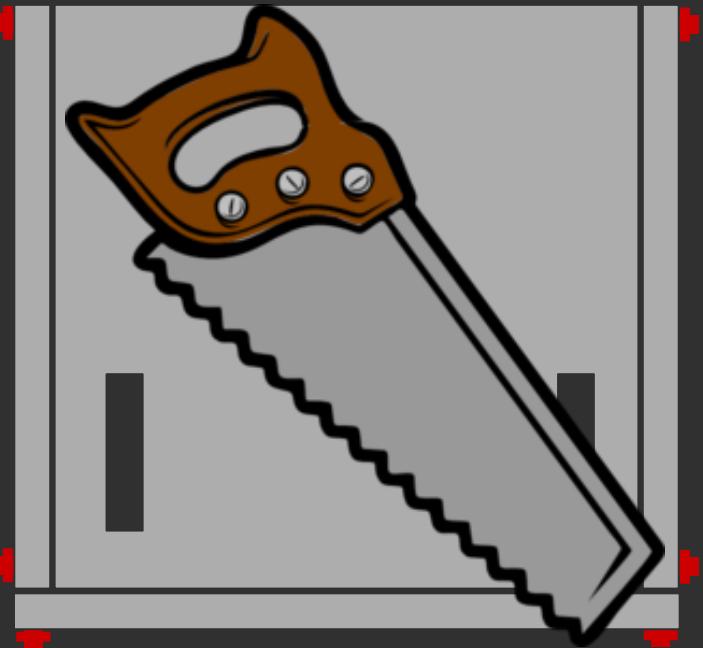

Size

Exactly 50cm

# Design Tips

Size

Exactly 50cm

More Than 50cm

# Design Tips

**Read the rules first!**

- Movement
- Exposed Mechanisms
- Servos
- Couplings
- Sensors
- Size
- Tooling

# Design Tips

## Electronics

- Where do your electronics go?
- How long should the wires be?
- Start/Stop button needs to be accessible
- USB stick needs to be accessible
- Battery needs protecting
- Servo cables

# Recommended Steps

1. Make a test base ASAP
2. Think about
  - o Mechanics
  - o Sensors
  - o Game strategy
3. Iterate
  - o Small improvements
  - o Keep it working
4. Testing, lots and lots of testing

Boston Dynamics

# General Tips

Need some help?

- Volunteers
- Tech Days
- Forums
- Bus factor
- Keep it simple
- Prototype early, and often

# THE KIT

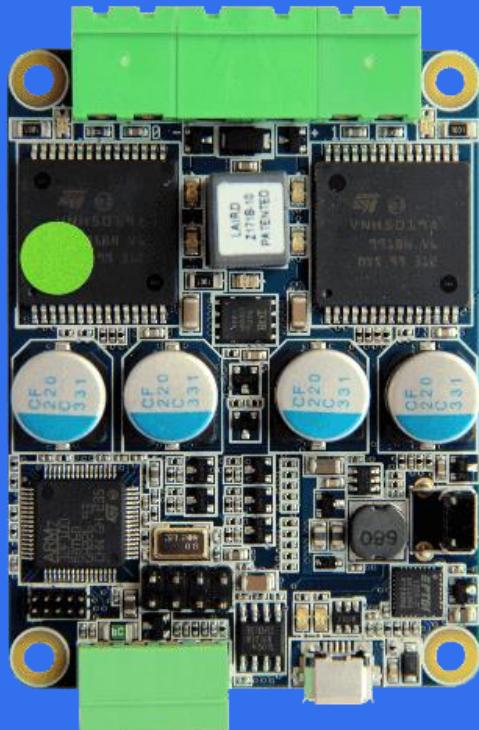

# Brain Board

*The brains of the operation*

- Controls boards
- Code runs here

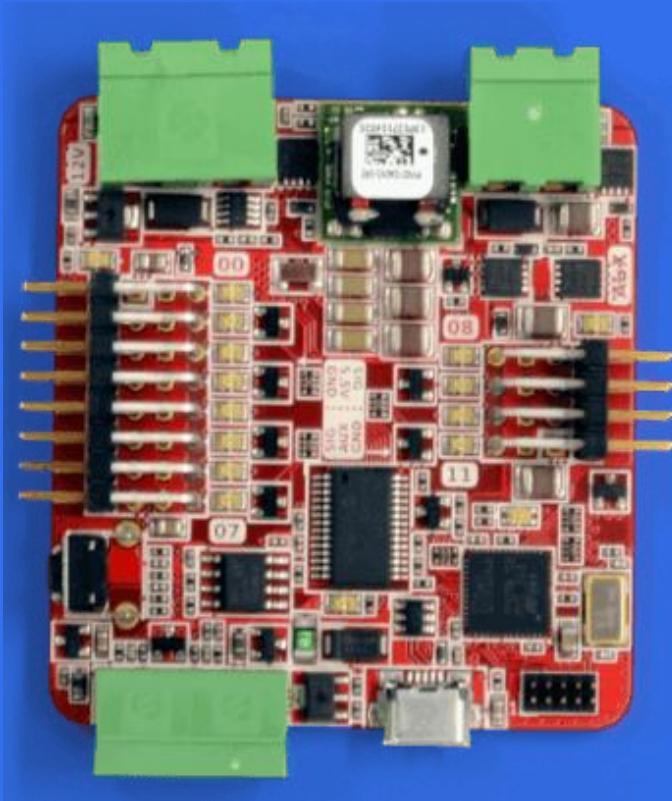

# Motor Board

*Controls motors*

- **12V DC** motors, up to **10A**
- \* motors not included

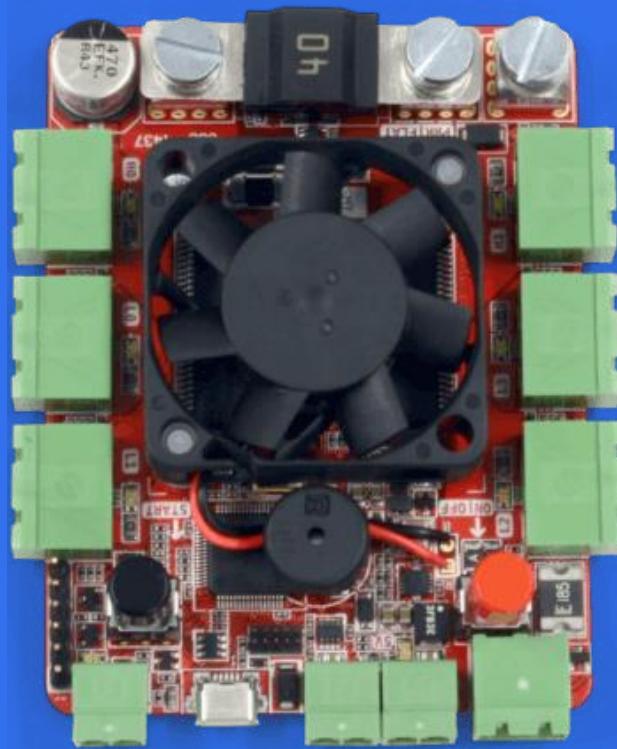

# Servo Board

*Controls servos*

- Up to 12 RC servo motors
- Careful how you load them,  
though!
- \*servos not included

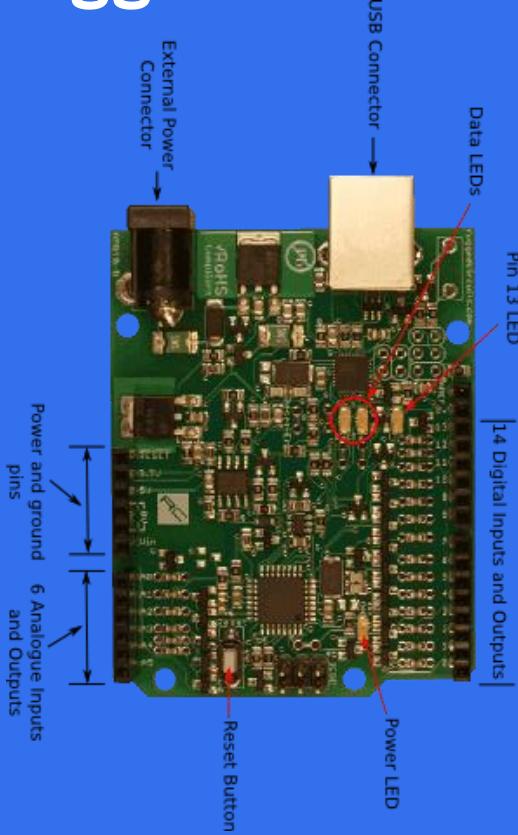

# Power Board

*POOOOWWWEEEERRRR!*

- Power distribution
  - High-current 12V
  - Low-current 12V
  - 5V
- On|Off button
- Start button

# Ruggeduino

## *General Purpose IO*

- Bump switches (Have I hit something?)
- Pressure sensors (How hard have I hit it?)
- Light gates (Have I captured something?)
- Ultrasound (How far away is something?)
- \* sensors not included

# Batteries

= =

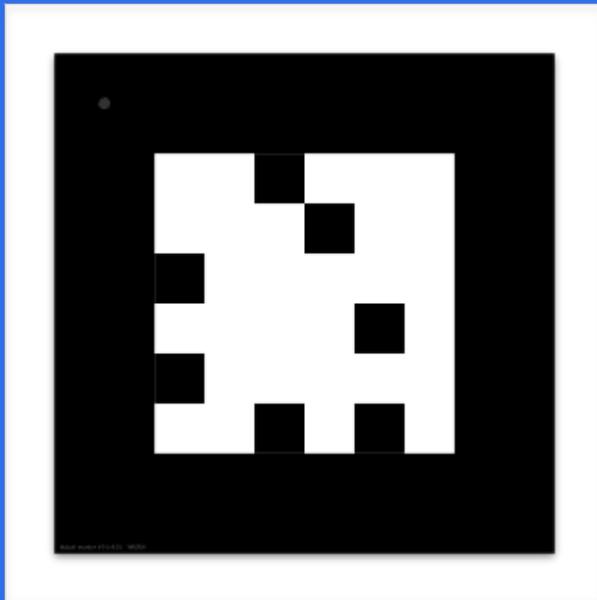

# Batteries

- Should be respected
- Follow battery charging procedure to the letter, every time (one of the microgames)
- Only ever connect to:
  - power board
  - supplied battery charger
- Protect it from mechanical damage
- Do not over-discharge
- If you're unsure, **read the docs!**

# Vision

- On Arena walls & tokens
- Properties:
  - Type
  - Number
  - Distance from webcam
  - Position relative to webcam
  - Rotation

# YOUR CODE

# Your Code

- Python 2.7
- The IDE
  - Collaborative development
  - History of changes
- `robot.zip`

## DOCUMENTATION

# Read The Docs!

## They're really useful!

## INTRODUCTION

There are a number of sections in the documentation, offering help for the [IDE](#), the [kit](#) and [programming](#). Under the [tutorials](#) section, a number of these things are combined to help you understand what you can, or need, to do. Navigation of the documentation can be done using the column to the left, where everything is arranged alphabetically in the aforementioned sub-sections.

Within this documentation, you will come across a number of boxes like this:

# code example

These are code examples provided to help you.

From time to time, you may come across some warnings such as the following:

Charge Your Batteries!

It would be advisable to take note of these, especially that one! You will also come across some blue boxes providing information, similar to the following:

Some useful information... like the information given in the information box above.

[studentrobotics.org/docs](https://studentrobotics.org/docs)

Our documentation

# The Forum

- Communicate with us and your fellow teams
- Get support
- Share tricks
- Brag about how good your team is!

# HEALTH AND SAFETY

# Health and Safety

- How easy is it to turn off
- If we pick it up, can it hurt us?
- Is the wiring messy or loose?
  - Colour code your wiring!
- Is the kit loose?
- Is the battery protected?

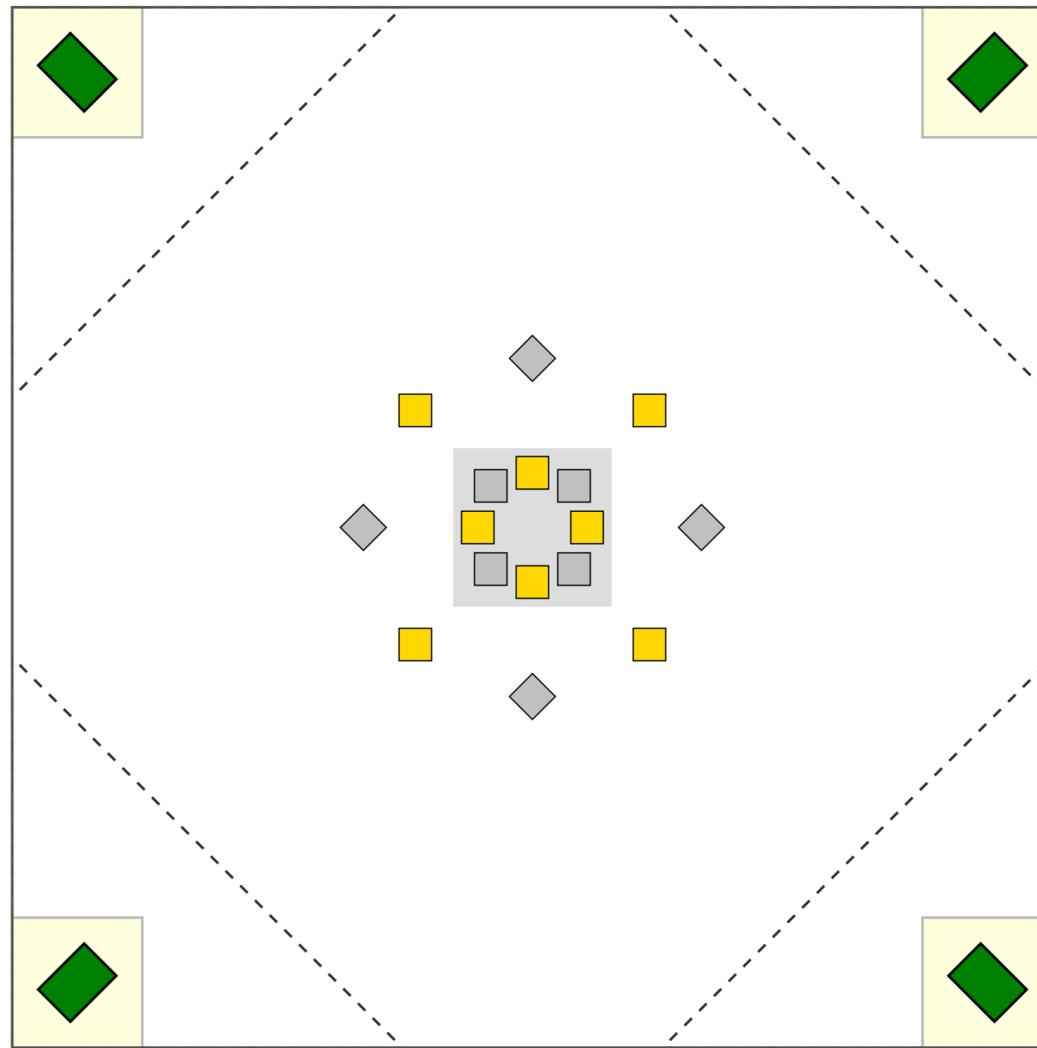

# Any questions so far?

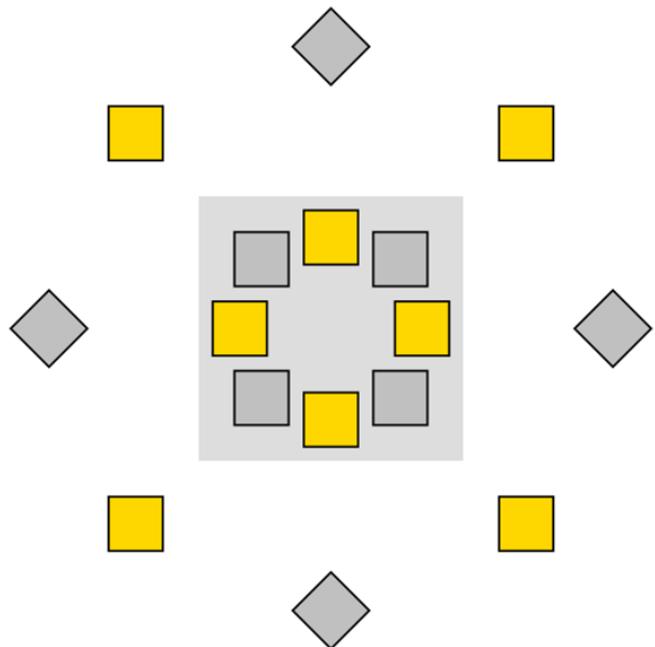

Before we get onto the main event...

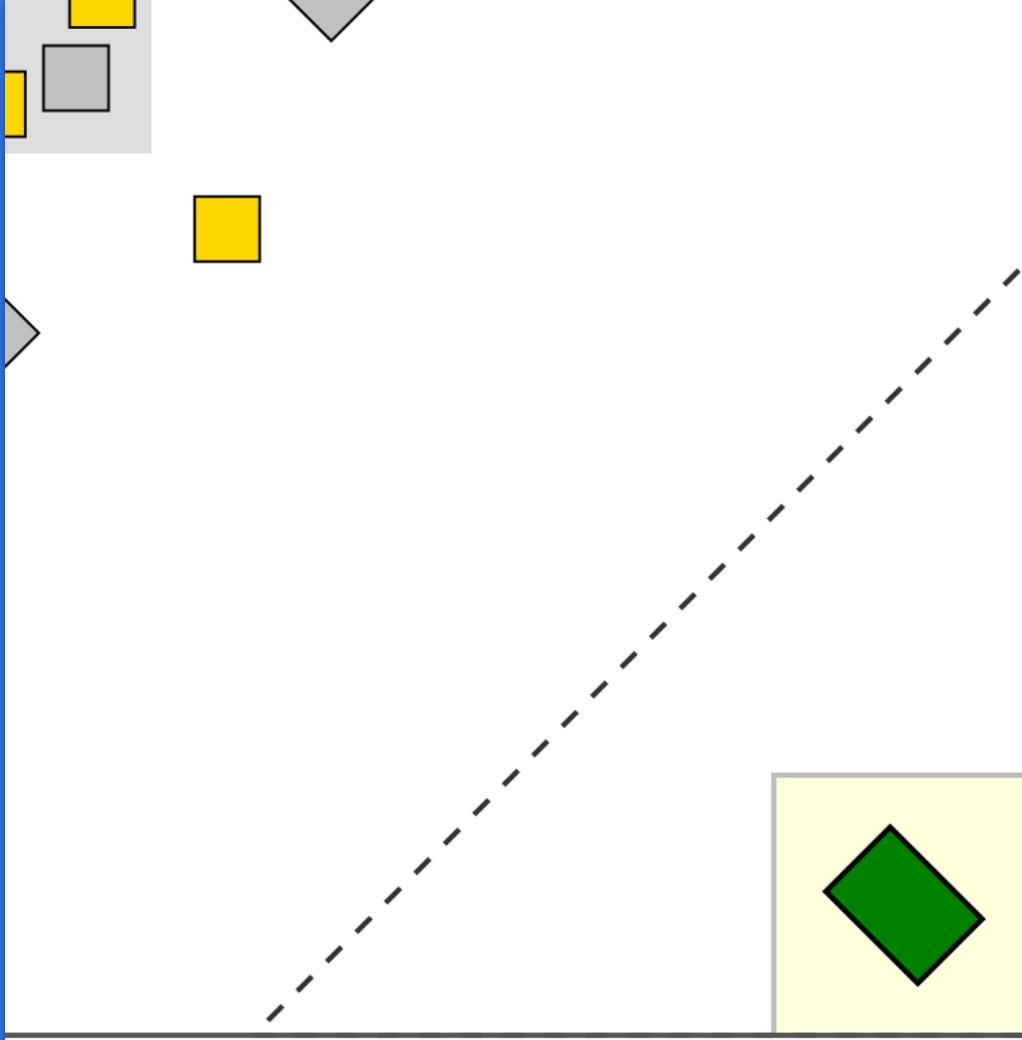

# THE GAME

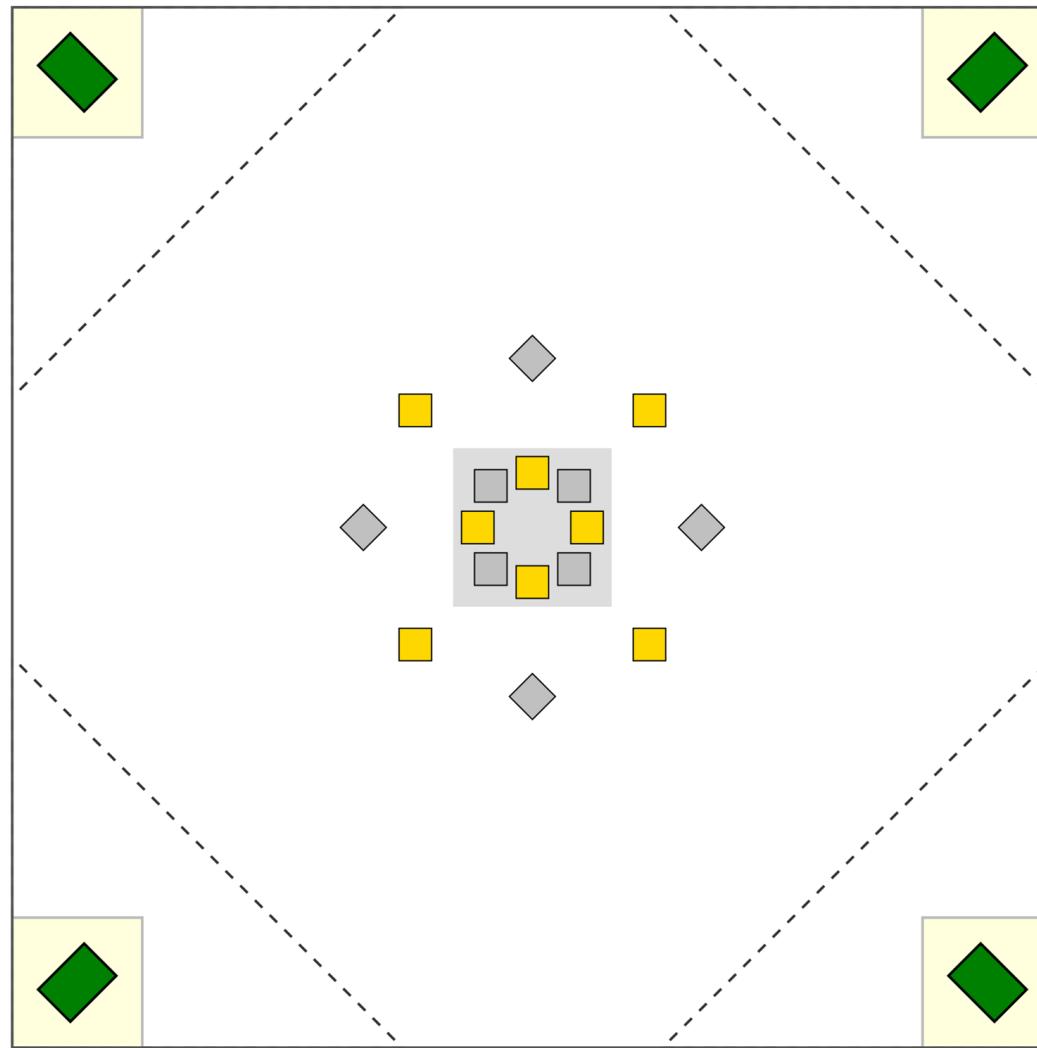

The moment you've all been waiting for!

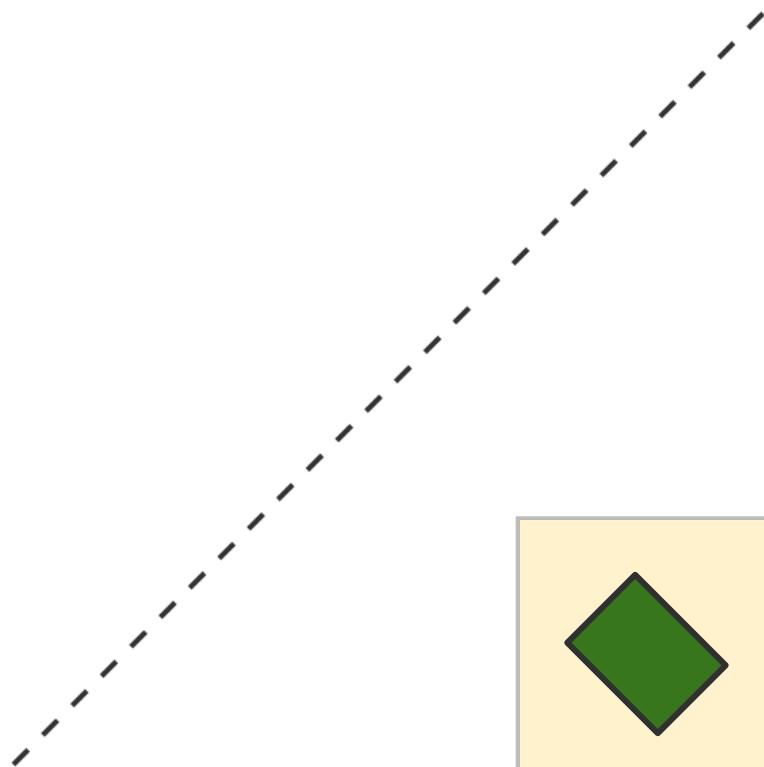

TWO COLOURS

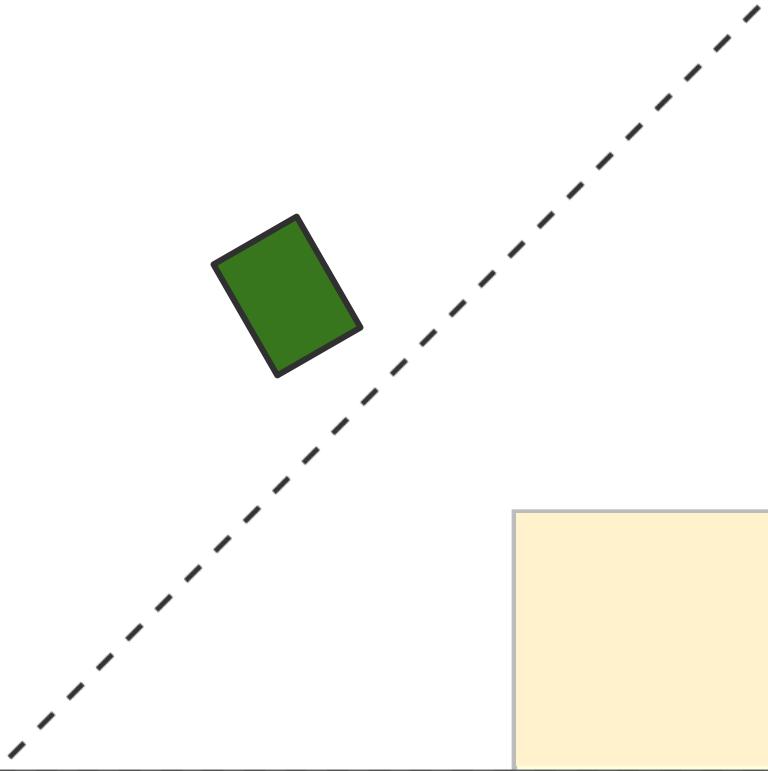

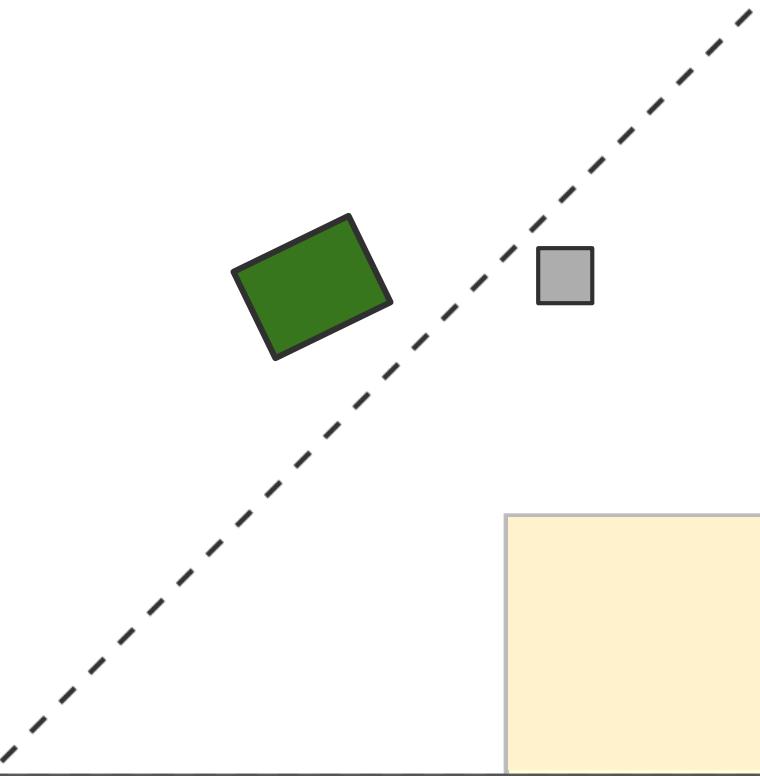

0 Points

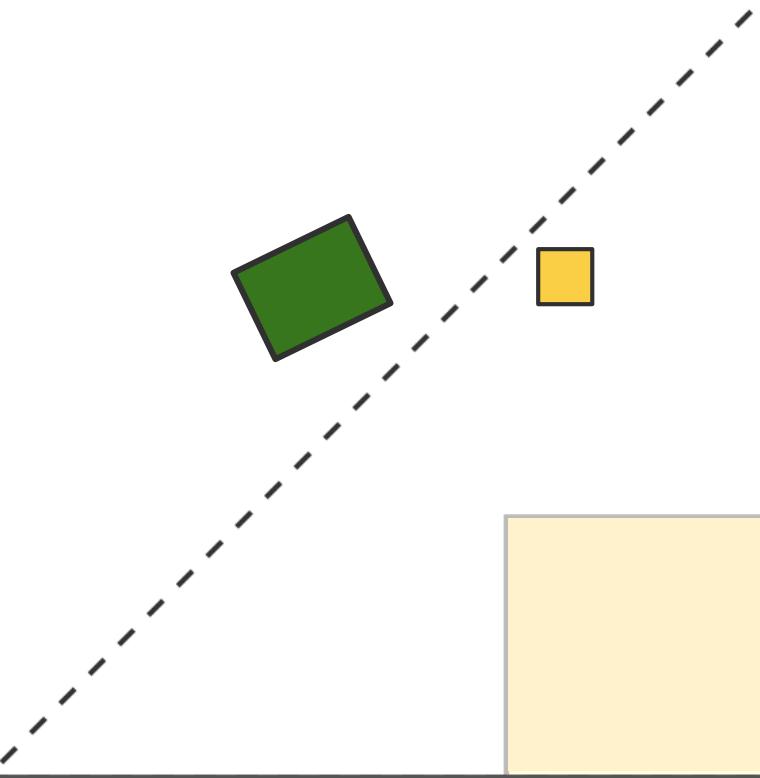

**1 Point**  
**Robot left scoring zone**

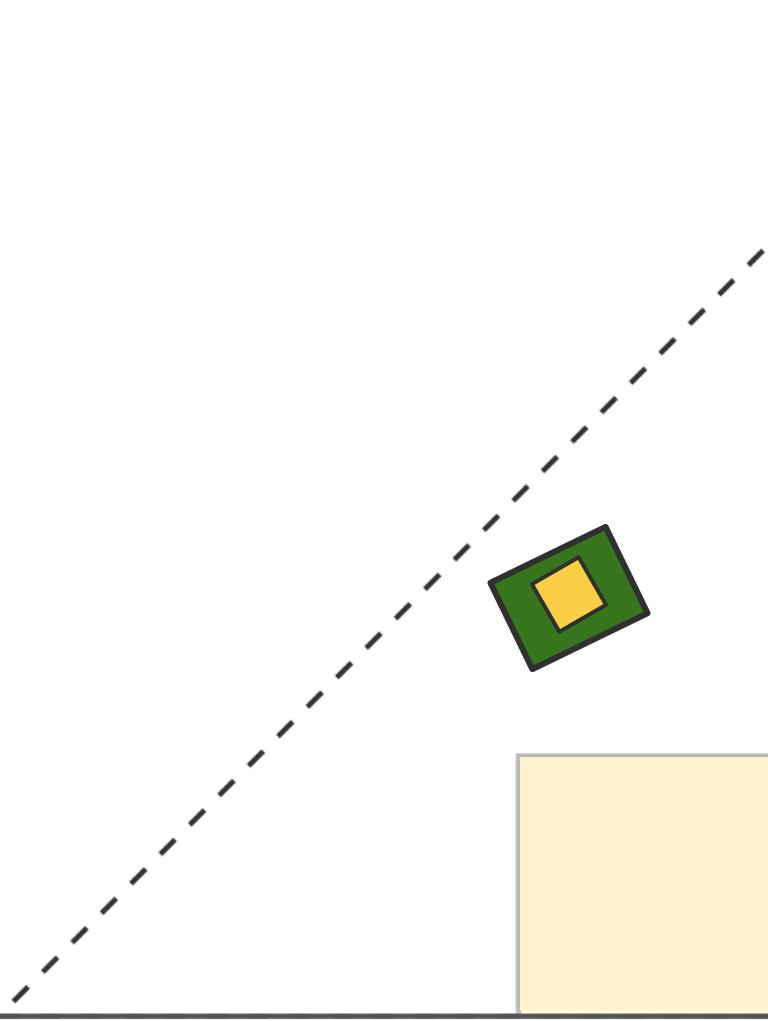

3 Points

(+1 for robot leaving zone)

3 Points

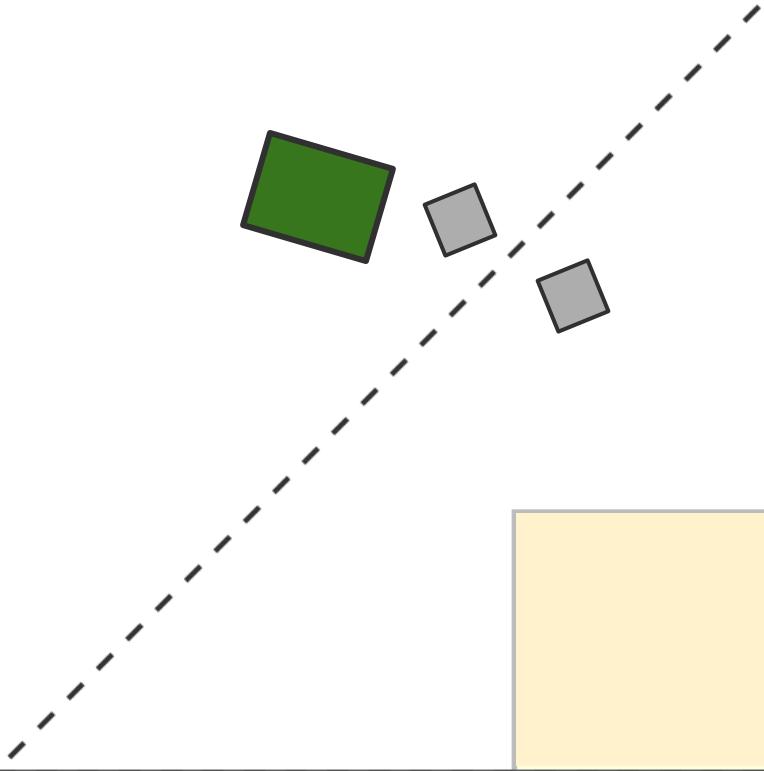

(+1 for robot leaving zone)

0 Points

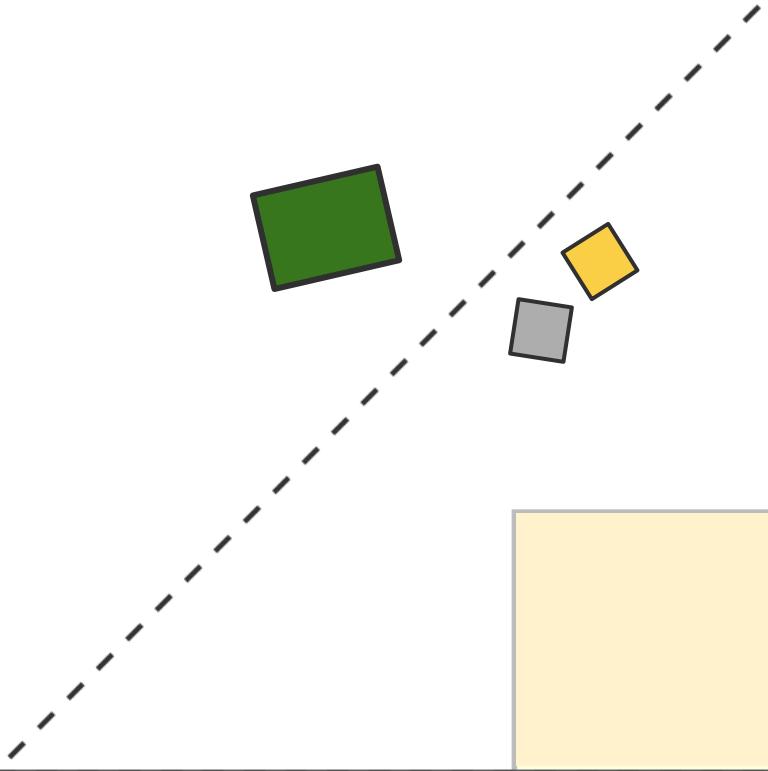

Cubes must be on floor

# The Rules

Read them!

They're **very** helpful!

## Student Robotics 2020 Rulebook

1<sup>st</sup> Revision

October 24, 2019

The following defines the rules and regulations of the Student Robotics 2020 competition. The latest version of this document can be found at <https://www.studentrobotics.org/docs/rules/>.

### 1. Game Rules

1.1 The game, called **Two Colours**, will be played in the arena defined in section 3.3. The objective of this game is to capture the most tokens, but without mixing the two colours.

1.2 Before a match begins, participating teams must:

- a) Present their robot in the staging area, adjacent to the arena, before the scheduled close of staging time. The staging area will be clearly marked on the day.
- b) Attach a robot flag. Robot flags will be provided by Student Robotics officials in the staging area. Section 3.2 provides more information about these flags, as well as their dimensions and mounting requirements.
- c) Follow the directions of the match officials.

Teams that fail to comply with these rules—such as by arriving late—may forfeit the match, at the discretion of the judge.

1.3 A match lasts 150 seconds.

1.4 There will be a maximum of 4 robots in a match.

1.5 Robots will be started by, or at the direction of, match officials.

# THE REST OF TODAY

NOW	Kit handout
NEXT	Introduction to Micro Games
THEN	Micro Games
12:30 - 13:00	Lunch + Robot Brainstorming
13:00 - 17:00	Micro Games (Continued)

ANY QUESTIONS?

**GOOD LUCK!**
